

Department of Paleoceanography Seminars 2025

10 am, small seminar room, each last Tuesday of the month

Date	Presenter	Title
28.01.2025	Katarzyna Melaniuk	Multiproxy reconstruction of the variability of the East Greenland Current during the last 150 000 years (REHEAT)- primary results
25.02.2025	Ngoc Loi Nguyen	Nordic Sea foraminifera metabarcoding.
25.03.2025	Hasitha Nethupul	Marine paleo-biodiversity in Storfjordrenna based on aDNA analysis
22.04.2025	Joanna Pawłowska-Tomkiewicz	Sea-ice conditions influence the Arctic marine eukaryote community over 160,000 years: insights from sedimentary ancient DNA
27.05.2025	Mahima Pai	Changes in foraminiferal assemblages in Hornsund (2002–2024) and their environmental implications
24.06.2025	Natalia Szymańska	Foraminiferal Assemblages in the Everglades Biogeosystem
29.07.2025	Dhanushka Devendra	Baltic Sea sediments as archives of late Holocene environmental changes
30.09.2025	Magdalena Krajewska	Sources of Organic Matter Deposited in Arctic Fjord Sediments Based on Lipid Molecular Markers
28.10.2025	Ludwik Lubecki	Application of various molecular markers for investigating petrogenic inputs in coastal systems strongly impacted by anthropogenic stressors
25.11.2025	Małgorzata Szymczak-Żyła	Molecular geochemical markers as a tool in studies on the organic matter origin in sediments of North Atlantic fjords
12.2025	Magdalena Łącka-Wojciechowska	TBA
